SECTION 4 – PLANNED WORK DESCRIPTION

Wanted substances
Gold
Type of equipment used (drone, helicopter, ATV, trucks, drill rig, dynamite, etc.)
Truck, ATV, drone
Hours and period of operation of machinery (12 hours a day, 24 hours a day, 5 days a week, 7 days a week)
12/h per day during surface exploration, 24/h per day during drilling. Both 7 days per week
Scope of planned work (number of workers, area, volume, etc.)
Surface exploration has been 8 persons over a one month period. Drilling will be 10 persons over a three month period. Camp will be open from May 22 to end of drilling 2026 and will be located at the former Virginia Mine camp location (see maps). Airborn geophysic will be using a drone.

SECTION 5 – STATUS OF EXPLORATION PROJECT

Summary of previous work

The La Grande project has been the subject of several phases of exploration since the 1970s. Between 1995 and 2001, Virginia Mines carried out sustained exploration work including geophysical surveys, geochemical sampling, geological mapping, channel sampling, trenching, and diamond drilling. These programs led to the identification of several gold showings and the characterization of structures favorable to mineralization. Additional campaigns were conducted between 2006 and 2013, including high-resolution airborne surveys, drilling, and prospecting work on the eastern portion of the project. Since 2023, Electric Elements Mining Corp. has held the exclusive exploration rights. In the summer of 2024 and 2025, a four-person field crew carried out targeted geological mapping and targeted rock sampling.

SECTION 6 – DOCUMENTS TO JOIN

- ☒ Map in PDF format¹
- ☒ Shapefile (DBF, PRJ, SHP, SHX)²

¹ Exploration property map with the location of the planned work.
² The shapefile must include the property's exclusive exploration rights numbers and the location of the planned work.
